## 100% ORGANIC + FAIR + BEAN-TO-BAR

Our entire business is Fair Trade verified. We are a member of WFTO – the World Fair Trade Organization, which is the umbrella organization for global fair trade. The WFTO monitors business compliance with the 10 principles of fair trade like transparency, respect for the environment, the payment of fair prices and no use of child labour among others. For more on this, go to [www.zotter.at/fair-trade](http://www.zotter.at/fair-trade) and [www.wfto.com](http://www.wfto.com)

100% BEAN-TO-BAR: Zotter chocolates are produced starting from the bean in our bean-to-bar chocolate factory.

All the ingredients for the chocolate come from ORGANIC cultivation. The number of the organic board of control serves as identifying information. ORGANIC control number: AT-BIO-402

## THE PROTECTION OF THE ENVIRONMENT

is a very important aspect of our corporate philosophy.

Our environmental protection and our environmental measures are ISO 14001 and EMAS certified. EMAS-certified companies are recorded in a Europe-wide register and are regularly checked and monitored on a national level by environmental experts approved by the environment department.

**You can find our environmental declaration in German online at [www.zotter.at](http://www.zotter.at)**

## ORGANIC PLASTIC

If possible, we try to use organic plastic as much as possible: it is derived from renewable materials, is biodegradable and even compostable according to European Standard 13432.

## DESIGN

Designed by Andreas H. Gratze

We use certified paper and environmentally friendly colours for the packaging.

## ORGANIC SOY LECITHIN

Zotter uses lecithin exclusively from controlled organic cultivation. Organic soy lecithin is guaranteed free from genetic engineering and protects the environment because no rainforests are cleared for its cultivation.

## STORAGE ADVICE

**We do not use any artificial stabilizers or preservatives.** For this reason, our goods are more temperature sensitive than other high-quality chocolate products.

**Ideally you should store Zotter chocolates in a cool and dry place where the temperature is between 16 °C and 18 °C.**

You should not put the chocolates into a fridge. This way they would lose their substance because the humidity would let the sugar crystallise. If the temperature is too high, though, it will result in the emission of cocoa butter which will settle as a white film on the surface of the chocolate. The loss of the cocoa butter will dry out the chocolate – hence, the flavour of the chocolate will suffer.

# FAIR TO HUMANS AND THE ENVIRONMENT

## Chocolate for School

A gift that keeps on giving. 50 cents per chocolate sold go to the "Chocolate for School" charity project in Uganda.

Uganda's northern Karamoja region counts among the poorest areas in the country and at the same time it has one of the most challenging climates. There are long periods of drought followed by heavy, prolonged rainfall resulting in floods. This makes agriculture a difficult endeavour. Up to the 2000s, people in this region were largely nomadic until they were forced to settle and attempt to work and cultivate this inhospitable land. The local government didn't build any schools at all, so the Caritas charity eventually decided to build the first small school a few years ago, comprising of just two classrooms. The demand was enormous. Bit by bit, more classrooms and levels were implemented and as of 2020, the school accommodates around 600 primary school pupils from grades 1 to 6. The only thing that hasn't yet grown with the size of the school and the number of children is its canteen.

**FOR UGANDAN CHILDREN, SCHOOL LUNCHES ARE OFTEN THEIR ONLY MEAL OF THE DAY.**

The children love going to school, in particular because they are served a warm meal made from corn and beans. During the dry season, it's often the only meal they get. **The goal of our "Chocolate for School" project is to help safeguard school lunches for these 600 children and to**

**pay for a proper extension to the canteen. We also aim to finance the schoolteachers' salaries:** it's very difficult to find teachers willing to work in this remote region, but with the prospect of a decent, regular income, more people might consider taking the job.

**With your sale of "Chocolate for School" chocolates, you are supporting this campaign and the children of Uganda!**

Together we can make a difference and enable the Ugandan children to have access to food and education. At least one nutritious meal a day is the essential minimum children should receive, and maybe with our combined efforts, we can even add the occasional piece of fruit to their plates.

## Ahoi! Emission-free sail-shipped cacao

Our cacao from Belize has travelled to us, entirely emission-free, via the sailboat Avontuur. The Avontuur is a 100-year-old two-masted schooner, which was lovingly restored and renovated for 17 months by 100 workers. It has just crossed the Atlantic for the fourth time, demonstrating that any merchandise can be transported in an eco-friendly manner. 90% of all global trade goods are transported by sea, usually on large heavy oil and diesel-engine container ships. There has so far been a distinct lack of alternatives to this method of transport.

The Avontuur's captain has invested his entire personal fortune in restoring the ship in order to discover new eco-friendly sea routes. The schooner is purely wind-powered, so no substances harmful to the climate are released.

The boat's crew of 15 consists of seven professional sailors in addition to volunteers from all over the world. The Avontuur travels for eight months from Elsleth near Hamburg via France, Portugal and Tenerife to the Caribbean, where it loads coffee, rum and cacao. All merchandise is hand-selected and the vessel can carry 114 tons of freight, making it the biggest sail cargo ship in the world, but compared to regular container ships, it's still a small fry. The sailboat is now carrying our "Sail Shipped Cacao" for the fourth time – initially from Nicaragua and now from Belize. In its home port, the Avontuur's merchandise is unloaded by pulley and partly even by hand and is then transported to Austria by train. In order to finance its eco-friendly sea cargo transport and "Mission Zero" approach, the Avontuur crew, cunning pirates that they are, now sell their own Avontuur Sail Rum. The idea has caused quite a stir, and just recently, the Austrian Brigantes ship, one of our collaborators, reported it was ready to set sail. Hail to the eco-friendly sea transport!
